

Video Download

The original video files can be downloaded from the **Austin.COGWA.org** Vimeo page at <http://vimeo.com/cogwaaustin>.

Tips on how to download a video:

- If not already a registered Vimeo user, a 'Basic' account (this is Free!) must be created in order to be able to download videos.
- Once logged in as a Vimeo user, select the video of interest.
- **Note: Recommend switching to the 'New Vimeo,' if not already the default.** *The 'new Vimeo' allows for the download of the original WMV video file, as well as MP4 versions of the video which are much smaller files. This makes it possible to download an MP4 version of the video at a fraction of the time it would take to download the original WMV video file.*
- Once on the video page, left-click once on the 'Download' icon located towards the bottom-center of the page.
- Now left-click (Note: do NOT right-click) once on video format you would like to download and the 'Save As' dialog box should pop up.
- Once the 'Save As' dialog box appears, save the video file to the desired folder location.

Please note that Basic account user will be restricted to downloading 5 original video files in a 24-hour period (see Vimeo download policy at http://vimeo.com/help/faq#download_limit).
